

PROTEK® SEARCHSTAR

SEARCH & RESCUE COVERALL

PROTEK® SEARCHSTAR Coveralls are designed for search and rescue operations (e.g. earthquake) and are manufactured in lightweight, fire resistant, breathable, high performance fabrics.

The flame resistance of the garment is permanent throughout the life and it can not be washed or worn out. Garments are permanently anti-static and prevent sparks due to static electric charge build-up which could lead to an explosion in presence of flammable chemicals such as liquid petroleum gases.

PROTEK® SEARCHSTAR Coveralls are made of NOMEX® Comfort fabrics to meet the highest expectations of our customers.

PROTEK® INDUSTRIAL SOLUTIONS

KIVANÇ Group produces personal protective clothing for different industrial applications. These garments are available in different designs like jacket & trousers, bib and brace trousers, coveralls, shirts etc. These garments are protecting workers in hazardous areas like Refineries, Oil & Gas Distribution Companies, Chemical & Petrochemical Plants, Electrical Utilities, Welding, Iron & Steel Companies and other industrial companies. These garments are designed to protect against sudden flash fire, impact of electric arcs, molten metal splashes etc. These garments are inherently flame resistant and do not melt, drip or ignite. The flame resistant property of the garment is permanent throughout the life and it cannot be washed or worn out. Garments are permanently anti-static and prevent sparks due to static electric charge build-up which could lead to an explosion in presence of flammable chemicals such as liquid petroleum gases.

We are a Member of the NOMEX® Quality Partner Program. Our customers are able to choose the right fabric for their application from our wide range of alternatives like NOMEX® Comfort, NOMEX® IIIA, NOMEX® MetalPro etc.
