

PROTEK® STATION UNIFORM

Station uniforms are designed for jobs requiring protection against sudden flash fire, impact of electric arcs etc. These garments are inherently flame resistant and do not melt, drip or ignite after flame spread. The flame resistance of the garment is permanent throughout the life and it cannot be washed or worn out. Garments are permanently anti-static and prevent sparks due to static electric charge build-up which could lead to an explosion in presence of flammable chemicals such as liquid petroleum gases.
